Author index for papers in Volume 47

Pages are numbered consecutively through the volume: 1–96, January; 97–368, March/May; 369–518, July; 519–729, September/November.

Abadeer, W. W.
553 see Mann, R. W.

Abbott, P. E.
445 see Hellman, D. J.

Adler, R. L., B. P. Kitchens, M. Martens, C. P. Tresser, and C. W. Wu
5 *The mathematics of halftoning*

Ahlgren, D. C.
101 see Dunn, J. S.

Ainspan, H. A.
259 see Friedman, D. J.

Ainspan, H. A.
337 see Reynolds, S. K.

Alfonseca, M.
483 see Ortega, A.

Allen, J. R., Jr., B. M. Bass, C. Basso, R. H. Boivie, J. L. Calvignac, G. T. Davis, L. Frelechoux, M. Heddes, A. Herkersdorf, A. Kind, J. F. Logan, M. Peyravian, M. A. Rinaldi, R. K. Sabhikhi, M. S. Siegel, and M. Waldvogel
177 *IBM PowerNP network processor: Hardware, software, and applications*

Apte, C. V., S. J. Hong, R. Natarajan, E. P. D. Pednault, F. A. Tipu, and S. M. Weiss
17 *Data-intensive analytics for predictive modeling*

Asaad, S. W.
299 see Moreno, J. H.

Bass, B. M.
177 see Allen, J. R., Jr.

Basso, C.
177 see Allen, J. R., Jr.

Ben-David, S.
299 see Moreno, J. H.

Beukema, T. J.
355 see Liu, D.

Beukema, T. J.
337 see Reynolds, S. K.

Bhavnagarwala, A. J.
283 see Kosonocky, S. V.

Biberstein, M.
299 see Moreno, J. H.

Biskeborn, R. G., and J. H. Eaton
385 *Hard-disk-drive technology flat heads for linear tape recording*

Bohrer, P. J.
641 see Shafi, H.

Boivie, R. H.
177 see Allen, J. R., Jr.

Bona, G.-L., R. Germann, and B. J. Offrein
239 *SiON high-refractive-index waveguide and planar lightwave circuits*

Boquet, J.
139 see Harame, D. L.

Bose, P.
9150 see Brooks, D.

Bradley, D. J., R. E. Harper, and S. W. Hunter
703 *Workload-based power management for parallel computer systems*

Bradshaw, R., and C. Schroeder
373 *Fifty years of IBM innovation with information storage on magnetic tape*

Breitwisch, M. J.
553 see Mann, R. W.

Brock, B. C.
631 see Nowka, K. J.

Brooks, D., P. Bose, V. Srinivasan, M. K. Gschwind, P. G. Emma, and M. G. Rosenfield
653 *New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors*

Brown, J. S.
553 see Mann, R. W.

Bula, O.
553 see Mann, R. W.

Calvignac, J. L.
177 see Allen, J. R., Jr.

Carpenter, G. D.
631 see Nowka, K. J.

Chevillat, P. R., and W. Schott
327 *Broadband radio LANs and the evolution of wireless beyond 3G*

Childers, E. R., W. Imaino, J. H. Eaton, G. A. Jaquette, P. V. Koeppe, and D. J. Hellman
471 *Six orders of magnitude in linear tape technology: The one-terabyte project*

Chin, K.
283 see Kosonocky, S. V.

Clauberg, R.
211 *Data aggregation architectures for single-chip SDH/SONET framers*

Colwill, B. C.
553 see Mann, R. W.

Conrady, D. P.
77 see Wisniewski, M. Y. L.

Coolbaugh, D. D.
101 see Dunn, J. S.

Cottrell, P. E.
553 see Mann, R. W.

Crocco, W. G., Jr.
553 see Mann, R. W.

Dalhoum, A. A.
483 see Ortega, A.

Davis, G. T.
177 see Allen, J. R., Jr.

Deicke, J., and W. Mueller
453 *Tape management in a storage networking environment*

Derby, J. H.
299 see Moreno, J. H.

Dickey, C. E.
139 see Harame, D. L.

Dietrich, B. L., and A. J. Hoffman
25 *On greedy algorithms, partially ordered sets, and submodular functions*

Dunn, J. S., D. C. Ahlgren, D. D. Coolbaugh, N. B. Feilchenfeld, G. Freeman, D. R. Greenberg, R. A. Groves, F. J. Guarín, Y. Hammad, A. J. Joseph, L. D. Lanzerotti, S. A. St.Onge, B. A. Orner, J.-S. Rieh, K. J. Stein, S. H. Voldman, P.-C. Wang, M. J. Zierak, S. Subbanna, D. L. Harame, D. A. Herman, Jr., and B. S. Meyerson
101 *Foundation of rf CMOS and SiGe BiCMOS technologies*

Eaton, J. H.
385 see Biskeborn, R. G.

Eaton, J. H.
471 see Childers, E. R.

Emma, P. G.
653 see Brooks, D.

Engbersen, A. P.
195 *Prizma switch technology*

Erturk, M.
139 see Harame, D. L.

Feilchenfeld, N. B.
101 see Dunn, J. S.

Felter, W. M., T. W. Keller, M. D. Kistler, C. Lefurgy, K. Rajamani, R. Rajamony, F. L. Rawson, B. A. Smith, and E. Van Hensbergen
671 *On the performance and use of dense servers*

Fiorenza, G.
77 see Wisniewski, M. Y. L.

Flint, E. B.
355 see Liu, D.

Floyd, B. A.
337 see Reynolds, S. K.

Fox, T. W.
299 see Moreno, J. H.

Franch, R. L.
77 see Wisniewski, M. Y. L.

Freeman, G.
101 see Dunn, J. S.

Frelechoux, L.
177 see Allen, J. R., Jr.

Friedman, D. J., M. Meghelli, B. D. Parker, J. Yang, H. A. Ainspan, A. V. Rylyakov, Y. H. Kwark, M. B. Ritter, L. Shan, S. J. Zier, M. Sorna, and M. Soyuer
259 *SiGe BiCMOS integrated circuits for high-speed serial communication links*

Friend, D. M.
611 see Plouchart, J.-O.

Furkay, S. S.
553 see Mann, R. W.

Gaucher, B. P.
355 see Liu, D.

Germann, R.
239 see Bona, G.-L.

Geva, A.
299 see Moreno, J. H.

Greenberg, D. R.
101 see Dunn, J. S.

Gristede, G. D.
283 see Kosonocky, S. V.

Groves, R. A.
101 see Dunn, J. S.

Groves, R. A.
139 see Harame, D. L.

Gschwind, M. K.
653 see Brooks, D.

Guarín, F. J.
101 see Dunn, J. S.

Gustavson, F. G.
31 *High-performance linear algebra algorithms using new generalized data structures for matrices*

Haen, A.-M.
283 see Kosonocky, S. V.

Hammad, Y.
101 see Dunn, J. S.

Harame, D. L., K. M. Newton, R. Singh, S. L. Sweeney, S. E. Strang, J. B. Johnson, S. M. Parker, C. E. Dickey, M. Erturk, G. J. Schulberg, D. L. Jordan, D. C. Sheridan, M. P. Keene, J. Boquet, R. A. Groves, M. Kumar, D. A. Herman, Jr., and B. S. Meyerson
139 *Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies*

Harame, D. L.
101 see Dunn, J. S.

Harper, R. E.
703 see Bradley, D. J.

Hauser, M. J.
553 see Mann, R. W.

Heddes, M.
177 see Allen, J. R., Jr.

Hellman, D. J., R. Yardy, and P. E. Abbott
445 *Innovations in tape storage automation at IBM*

Hellman, D. J.
471 see Childers, E. R.

Herkersdorf, A.
177 see Allen, J. R., Jr.

Herman, D. A., Jr.
101 see Dunn, J. S.

Herman, D. A., Jr.
139 see Harame, D. L.

Hoffman, A. J.
25 see Dietrich, B. L.

Hogan, W. K.
251 see Trewhella, J. M.

Hong, S. J.
17 see Apte, C. V.

Hook, T. B.
553 see Mann, R. W.

Horiguchi, M.
525 see Nakagome, Y.

Hoyniak, D.
553 see Mann, R. W.

Hsiao, W. D.
401 see Iben, I. E. T.

Hunter, H.
299 see Moreno, J. H.

Hunter, S. W.
703 see Bradley, D. J.

Hwang, W.
283 see Kosonocky, S. V.

Iben, I. E. T.
415 *Head reliability of AMR sensors based on thermal stress tests*

Iben, I. E. T., Y.-M. Lee, and W. D. Hsiao
401 *Steady-state thermal characteristics of AMR read/write heads used in tape storage drives*

Imaino, W.
471 see Childers, E. R.

Itoh, K.
525 see Nakagome, Y.

Jaquette, G. A.
429 *LTO: A better format for mid-range tape*

Jaquette, G. A.
471 see Childers, E. R.

Jenkins, K. A.
611 see Plouchart, J.-O.

Johnson, G. W.
251 see Trewhella, J. M.

Johnson, J. B.
139 see Harame, D. L.

Johnson, J. M.
553 see Mann, R. W.

Jordan, D. L.
139 see Harame, D. L.

Joseph, A. J.
101 see Dunn, J. S.

Kailas, K.
299 see Moreno, J. H.

Karst, D. L.
251 see Trewhella, J. M.

Kawahara, T.
525 see Nakagome, Y.

Keene, M. P.
139 see Harame, D. L.

Keller, T. W.
671 see Felter, W. M.

Ketchen, M. B.
283 see Kosonocky, S. V.

Kim, J.
611 see Plouchart, J.-O.

Kim, S., C. H. Ziesler, and M. C. Papaefthymiou
599 *Fine-grain real-time reconfigurable pipelining*

Kim, S.
283 see Kosonocky, S. V.

Kim, S.
611 see Plouchart, J.-O.

Kind, A.
177 see Allen, J. R., Jr.

Kishi, G. T.
459 *The IBM Virtual Tape Server: Making tape controllers more autonomic*

Kistler, M. D.
671 see Felter, W. M.

Kitchens, B. P.
5 see Adler, R. L.

Knebel, D. R.
283 see Kosonocky, S. V.

Knebel, D. R.
611 see Plouchart, J.-O.

Koeppe, P. V.
471 see Childers, E. R.

Kosonocky, S. V., A. J. Bhavnagarwala, K. Chin, G. D. Gristede, A.-M. Haen, W. Hwang, M. B. Ketchen, S. Kim, D. R. Knebel, K. W. Warren, and V. Zyuban
283 *Low-power circuits and technology for wireless digital systems*

Kosonocky, S. V.
611 see Plouchart, J.-O.

Kuchta, D. M.
223 see Pepeljugoski, P. K.

Kumar, M.
139 see Harame, D. L.

Kwark, Y. H.
259 see Friedman, D. J.

Lam, C. H.
553 see Mann, R. W.

Lanzerotti, L. D.
101 see Dunn, J. S.

Lee, Y.-M.
401 see Iben, I. E. T.

Lefurgy, C.
671 see Felter, W. M.

Littrell, D.
299 see Moreno, J. H.

Liu, D., B. P. Gaucher, E. B. Flint, T. W. Studwell, H. Usui, and T. J. Beukema
355 *Developing integrated antenna subsystems for laptop computers*

Logan, J. F.
177 see Allen, J. R., Jr.

Lougee-Heimer, R.
57 *The Common Optimization INterface for Operations Research: Promoting open-source software in the operations research community*

Lustig, N. E.
611 see Plouchart, J.-O.

Mann, R. W., W. W. Abadeer, M. J. Breitwisch, O. Bula, J. S. Brown, B. C. Colwill, P. E. Cottrell, W. G. Crocco, Jr., S. S. Furkay, M. J. Hauser, T. B. Hook, D. Hoyniak, J. M. Johnson, C. H. Lam, R. D. Mih, J. Rivard, A. Moriwaki, E. Phipps, C. S. Putnam, B. A. Rainey, J. J. Toomey, and M. I. Younus
553 *Ultralow-power SRAM technology*

Martens, M., and T. J. Nowicki
67 *Ergodic theory of one-dimensional dynamics*

Martens, M.
5 see Adler, R. L.

Matick, R. E.
495 *Comparison of analytic performance models using closed mean-value analysis versus open-queuing theory for estimating cycles per instruction of memory hierarchies*

Meghelli, M.
259 see Friedman, D. J.

Melhem, R.
689 see Rusu, C. A.

Meyerson, B. S.
101 see Dunn, J. S.

Meyerson, B. S.
139 see Harame, D. L.

Mih, R. D.
553 see Mann, R. W.

Moreno, J. H., V. Zyuban, U. Shvadron, F. D. Neeser, J. H. Derby, M. S. Ware, K. Kailas, A. Zaks, A. Geva, S. Ben-David, S. W. Asaad, T. W. Fox, D. Littrell, M. Biberstein, D. Naishlos, and H. Hunter
299 *An innovative low-power high-performance programmable signal processor for digital communications*

Moriwaki, A.
553 see Mann, R. W.

Mossé, D.
689 see Rusu, C. A.

Mueller, W.
453 see Deicke, J.

Naishlos, D.
299 see Moreno, J. H.

Nakagome, Y., M. Horiguchi, T. Kawahara, and K. Itoh
525 *Review and future prospects of low-voltage RAM circuits*

Narasimha, S.
611 see Plouchart, J.-O.

Natarajan, R.
17 see Apte, C. V.

Neeser, F. D.
299 see Moreno, J. H.

Newton, K. M.
139 see Harame, D. L.

Nowicki, T. J.
67 see Martens, M.

Nowka, K. J., G. D. Carpenter, and B. C. Brock
631 *The design and application of the PowerPC 405LP energy-efficient system-on-a-chip*

Noyan, I. C.
77 see Wisniewski, M. Y. L.

O'Neil, P.
611 see Plouchart, J.-O.

Offrein, B. J.
239 see Bona, G.-L.

Oklobdzija, V. G.
567 *Clocking and clocked storage elements in a multi-gigahertz environment*

Orner, B. A.
101 see Dunn, J. S.

Ortega, A., A. A. Dalhoum, and M. Alfonseca
483 *Grammatical evolution to design fractal curves with a given dimension*

Papaefthymiou, M. C.
599 see Kim, S.

Parker, B. D.
259 see Friedman, D. J.

Parker, S. M.
139 see Harame, D. L.

Pednault, E. P. D.
17 see Apte, C. V.

Pepeljugoski, P. K., and D. M. Kuchta
223 *Design of optical communications data links*

Peterson, J. L.
641 see Shafi, H.

Peyravian, M.
177 see Allen, J. R., Jr.

Pfeiffer, U. R.
337 see Reynolds, S. K.

Phan, N.
611 see Plouchart, J.-O.

Phelan, J.
641 see Shafi, H.

Phipps, E.
553 see Mann, R. W.

Plouchart, J.-O., N. Zamdmer, J. Kim, M. Sherony, Y. Tan, A. Ray, M. Talbi, L. F. Wagner, K. Wu, N. E. Lustig, S. Narasimha, P. O'Neil, N. Phan, M. Rohn, J. Strom, D. M. Friend, S. V. Kosonocky, D. R. Knebel, S. Kim, K. A. Jenkins, and M. M. Rivier
611 *Application of an SOI 0.12-μm CMOS technology to SoCs with low-power and high-frequency circuits*

Pulleyblank, W. R.
89 *Mathematical sciences in the nineties*

Putnam, C. S.
553 see Mann, R. W.

Rainey, B. A.
553 see Mann, R. W.

Rajamani, K.
671 see Felter, W. M.

Rajamony, R.
671 see Felter, W. M.

Rawson, F. L.
671 see Felter, W. M.

Ray, A.
611 see Plouchart, J.-O.

Reynolds, S. K., B. A. Floyd, T. J. Beukema, T. Zwick, U. R. Pfeiffer, and H. A. Ainspan
337 *A direct-conversion receiver integrated circuit for WCDMA mobile systems*

Rieh, J.-S.
101 see Dunn, J. S.

Rinaldi, M. A.
177 see Allen, J. R., Jr.

Ritter, M. B.
259 see Friedman, D. J.

Rivard, J.
553 see Mann, R. W.

Rivier, M. M.
611 see Plouchart, J.-O.

Rohn, M.
611 see Plouchart, J.-O.

Rosenfield, M. G.
653 see Brooks, D.

Rusu, C. A., R. Melhem, and D. Mossé
689 *Maximizing the system value while satisfying time and energy constraints*

Rusu, C. A.
689 see Shafi, H.

Rylyakov, A. V.
259 see Friedman, D. J.

Sabhikhi, R. K.
177 see Allen, J. R., Jr.

Schott, W.
327 see Chevillat, P. R.

Schroeder, C.
373 see Bradshaw, R.

Schulberg, G. J.
139 see Harame, D. L.

Shafi, H., P. J. Bohrer, J. Phelan, C. A. Rusu, and J. L. Peterson
641 *Design and validation of a performance and power simulator for PowerPC systems*

Shan, L.
259 see Friedman, D. J.

Sheridan, D. C.
139 see Harame, D. L.

Sherony, M.
611 see Plouchart, J.-O.

Shvadron, U.
299 see Moreno, J. H.

Siegel, M. S.
177 see Allen, J. R., Jr.

Singh, R.
139 see Harame, D. L.

Smith, B. A.
671 see Felter, W. M.

Sorna, M.
259 see Friedman, D. J.

Soyuer, M.
259 see Friedman, D. J.

Srinivasan, V.
653 see Brooks, D.

St.Onge, S. A.
101 see Dunn, J. S.

Stein, K. J.
101 see Dunn, J. S.

Strang, S. E.
139 see Harame, D. L.

Strenski, P. N.
585 see Zyuban, V.

Strom, J.
611 see Plouchart, J.-O.

Studwell, T. W.
355 see Liu, D.

Subbanna, S.
101 see Dunn, J. S.

Sweeney, S. L.
139 see Harame, D. L.

Talbi, M.
611 see Plouchart, J.-O.

Tan, Y.
611 see Plouchart, J.-O.

Tipu, F. A.
17 see Apte, C. V.

Toomey, J. J.
553 see Mann, R. W.

Tresser, C. P.
5 see Adler, R. L.

Trewhella, J. M., G. W. Johnson, W. K. Hogan, and D. L. Karst
251 *Evolution of optical subassemblies in IBM data communication transceivers*

Usui, H.
355 see Liu, D.

Van Hensbergen, E.
671 see Felter, W. M.

Voldman, S. H.
101 see Dunn, J. S.

Wagner, L. F.
611 see Plouchart, J.-O.

Waldvogel, M.
177 see Allen, J. R., Jr.

Wang, P.-C.
101 see Dunn, J. S.

Ware, M. S.
299 see Moreno, J. H.

Warren, K. W.
283 see Kosonocky, S. V.

Weiss, S. M.
17 see Apte, C. V.

Wisniewski, M. Y. L., E. Yashchin, R. L. Franch, D. P. Conrady, G. Fiorenza, and I. C. Noyan
77 *Estimating the efficiency of collaborative problem-solving, with applications to chip design*

Wu, C. W.
5 see Adler, R. L.

Wu, K.
611 see Plouchart, J.-O.

Yang, J.
259 see Friedman, D. J.

Yardy, R.
445 see Hellman, D. J.

101 see Dunn, J. S.

Ziesler, C. H.
599 see Kim, S.

Zwick, T.
337 see Reynolds, S. K.

Zyuban, V., and P. N. Strenski
585 *Balancing hardware intensity in microprocessor pipelines*

Zyuban, V.
283 see Kosonocky, S. V.

Zyuban, V.
299 see Moreno, J. H.

Subject index for papers in Volume 47

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page
Algorithms		
High-performance linear algebra algorithms using new generalized data structures for matrices	Gustavson	31
Mathematical sciences in the nineties	Pulleyblank	89
Maximizing the system value while satisfying time and energy constraints	Rusu	689
On greedy algorithms, partially ordered sets, and submodular functions	Dietrich	25
Workload-based power management for parallel computer systems	Bradley	703
Analytical models		
Data-intensive analytics for predictive modeling	Apte	17
Estimating the efficiency of collaborative problem-solving, with applications to chip design	Wisniewski	77
The Common Optimization INterface for Operations Research: Promoting open-source software in the operations research community	Lougee-Heimer	57
The mathematics of halftoning	Adler	5
Arrays		
High-performance linear algebra algorithms using new generalized data structures for matrices	Gustavson	31
Ultralow-power SRAM technology	Mann	553
Automata		
Innovations in tape storage automation at IBM	Hellman	445
Autonomic computing		
The IBM Virtual Tape Server: Making tape controllers more autonomic	Kishi	459
Circuit and device technology		
Clocking and clocked storage elements in a multi-gigahertz environment	Oklobdzija	567
Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies	Harame	139
Estimating the efficiency of collaborative problem-solving, with applications to chip design	Wisniewski	77
Low-power circuits and technology for wireless digital systems	Kosonocky	283
Review and future prospects of low-voltage RAM circuits	Nakagome	525
Circuit theory and analysis		
Clocking and clocked storage elements in a multi-gigahertz environment	Oklobdzija	567
Estimating the efficiency of collaborative problem-solving, with applications to chip design	Wisniewski	77
Low-power circuits and technology for wireless digital systems	Kosonocky	283
Review and future prospects of low-voltage RAM circuits	Nakagome	525
Ultralow-power SRAM technology	Mann	553
Clocking		
Clocking and clocked storage elements in a multi-gigahertz environment	Oklobdzija	567
CMOS		
Application of an SOI 0.12-μm CMOS technology to SoCs with low-power and high-frequency circuits	Plouchart	611
Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies	Harame	139
Foundation of rf CMOS and SiGe BiCMOS technologies	Dunn	101
Low-power circuits and technology for wireless digital systems	Kosonocky	283
Prizma switch technology	Engbersen	195
Coding theory		
High-performance linear algebra algorithms using new generalized data structures for matrices	Gustavson	31
Communications and communication networks		
A direct-conversion receiver integrated circuit for WCDMA mobile systems	Reynolds	337
Broadband radio LANs and the evolution of wireless beyond 3G	Chevillat	327
Data aggregation architectures for single-chip SDH/SONET framers	Clauberg	211
Design of optical communications data links	Pepeljugoski	223
Developing integrated antenna subsystems for laptop computers	Liu	355
Evolution of optical subassemblies in IBM data communication transceivers	Trewhella	251
IBM PowerNP network processor: Hardware, software, and applications	Allen	177
SiGe BiCMOS integrated circuits for high-speed serial communication links	Friedman	259

Complexity
Ergodic theory of one-dimensional dynamics — Martens 67

Computational methods
The Common Optimization INterface for Operations Research: Promoting open-source software in the operations research community — Lougee-Heimer 57

Computer applications
The Common Optimization INterface for Operations Research: Promoting open-source software in the operations research community — Lougee-Heimer 57

Computer architecture
Broadband radio LANs and the evolution of wireless beyond 3G — Chevillat 327
Comparison of analytic performance models using closed mean-value analysis versus open-queuing theory for estimating cycles per instruction of memory hierarchies — Matick 495
Data aggregation architectures for single-chip SDH/SONET framers — Clauberg 211
Prizma switch technology — Engbersen 195

Design automation
Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies — Harame 139

Device design
Application of an SOI 0.12-μm CMOS technology to SoCs with low-power and high-frequency circuits — Plouchart 611
Clocking and clocked storage elements in a multi-gigahertz environment — Oklobdzija 567
Review and future prospects of low-voltage RAM circuits — Nakagome 525

Ferrites
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385

Finite element analysis
Steady-state thermal characteristics of AMR read/write heads used in tape storage drives — Iben 401

Formal methods
On greedy algorithms, partially ordered sets, and submodular functions — Dietrich 25

Fractals
Grammatical evolution to design fractal curves with a given dimension — Ortega 483

Germanium
Foundation of rf CMOS and SiGe BiCMOS technologies — Dunn 101

Graphics
The mathematics of halftoning — Adler 5

Heterostructures and heterojunctions
Foundation of rf CMOS and SiGe BiCMOS technologies — Dunn 101

Image processing
The mathematics of halftoning — Adler 5

Imaging technology
The mathematics of halftoning — Adler 5

Integrated circuit design
A direct-conversion receiver integrated circuit for WCDMA mobile systems — Reynolds 337
SiGe BiCMOS integrated circuits for high-speed serial communication links — Friedman 259

Integrated circuits
SiGe BiCMOS integrated circuits for high-speed serial communication links — Friedman 259

Knowledge systems
Data-intensive analytics for predictive modeling — Apte 17

Large-scale computing
On the performance and use of dense servers — Felter 671

Local area networks (LANs)
Design of optical communications data links — Pepeljugoski 223

Magnetic head design
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385
Head reliability of AMR sensors based on thermal stress tests — Iben 415
Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471
Steady-state thermal characteristics of AMR read/write heads used in tape storage drives — Iben 401

Magnetic recording
Fifty years of IBM innovation with information storage on magnetic tape — Bradshaw 373
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385
Head reliability of AMR sensors based on thermal stress tests — Iben 415
Innovations in tape storage automation at IBM — Hellman 445
LTO: A better format for mid-range tape — Jaquette 429
Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471
Steady-state thermal characteristics of AMR read/write heads used in tape storage drives — Iben 401

Magnetic tape
Fifty years of IBM innovation with information storage on magnetic tape — Bradshaw 373
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385
Innovations in tape storage automation at IBM — Hellman 445
LTO: A better format for mid-range tape — Jaquette 429

Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471

Magnetoresistance
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385
Head reliability of AMR sensors based on thermal stress tests — Iben 415
Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471
Steady-state thermal characteristics of AMR read/write heads used in tape storage drives — Iben 401

Materials technology
Hard-disk-drive technology flat heads for linear tape recording — Biskeborn 385

Mathematical functions and techniques
Ergodic theory of one-dimensional dynamics — Martens 67
Grammatical evolution to design fractal curves with a given dimension — Ortega 483

Mathematics
Ergodic theory of one-dimensional dynamics — Martens 67
Grammatical evolution to design fractal curves with a given dimension — Ortega 483
High-performance linear algebra algorithms using new generalized data structures for matrices — Gustavson 31
Mathematical sciences in the nineties — Pulleyblank 89
On greedy algorithms, partially ordered sets, and submodular functions — Dietrich 25

Mathematics (applied)
Estimating the efficiency of collaborative problem-solving, with applications to chip design — Wisniewski 77
Mathematical sciences in the nineties — Pulleyblank 89
The mathematics of halftoning — Adler 5

Memory, random-access
Review and future prospects of low-voltage RAM circuits — Nakagome 525
Ultralow-power SRAM technology — Mann 553

Microprocessor systems and applications
An innovative low-power high-performance programmable signal processor for digital communications — Moreno 299
Balancing hardware intensity in microprocessor pipelines — Zyuban 585
IBM PowerNP network processor: Hardware, software, and applications — Allen 177
New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors — Brooks 653
On the performance and use of dense servers — Felter 671

Models and modeling
Data-intensive analytics for predictive modeling — Apte 17
Design and validation of a performance and power simulator for PowerPC systems — Shafi 641
Estimating the efficiency of collaborative problem-solving, with applications to chip design — Wisniewski 77
Mathematical sciences in the nineties — Pulleyblank 89
Maximizing the system value while satisfying time and energy constraints — Rusu 689
New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors — Brooks 653

Multimedia
Fine-grain real-time reconfigurable pipelining — Kim 599

Networks
Broadband radio LANs and the evolution of wireless beyond 3G — Chevillat 327
Data aggregation architectures for single-chip SDH/SONET framers — Clauberg 211
IBM PowerNP network processor: Hardware, software, and applications — Allen 177
SiON high-refractive-index waveguide and planar lightwave circuits — Bona 239

Operations research
The Common Optimization INterface for Operations Research: Promoting open-source software in the operations research community — Lougee-Heimer 57

Optical interconnections
Design of optical communications data links — Pepeljugoski 223
Evolution of optical subassemblies in IBM data communication transceivers — Trewhella 251

Optimization
Balancing hardware intensity in microprocessor pipelines — Zyuban 585
Maximizing the system value while satisfying time and energy constraints — Rusu 689
New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors — Brooks 653
Workload-based power management for parallel computer systems — Bradley 703

Optoelectronic device technology
Evolution of optical subassemblies in IBM data communication transceivers — Trewhella 251
SiON high-refractive-index waveguide and planar lightwave circuits — Bona 239

Packaging
Developing integrated antenna subsystems for laptop computers — Liu 355

Performance analysis
Comparison of analytic performance models using closed mean-value analysis versus open-queuing theory for estimating cycles per instruction of memory hierarchies — Matick 495
High-performance linear algebra algorithms using new generalized data structures for matrices — Gustavson 31

Power management
An innovative low-power high-performance programmable signal processor for digital communications — Moreno 299
Application of an SOI 0.12-μm CMOS technology to SoCs with low-power and high-frequency circuits — Plouchart 611
Balancing hardware intensity in microprocessor pipelines — Zyuban 585
Clocking and clocked storage elements in a multi-gigahertz environment — Oklobdzija 567
Design and validation of a performance and power simulator for PowerPC systems — Shafi 641
Fine-grain real-time reconfigurable pipelining — Kim 599
Low-power circuits and technology for wireless digital systems — Kosonocky 283
Maximizing the system value while satisfying time and energy constraints — Rusu 689
New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors — Brooks 653
On the performance and use of dense servers — Felter 671
The design and application of the PowerPC 405LP energy-efficient system-on-a-chip — Nowka 631
Workload-based power management for parallel computer systems — Bradley 703

Printing technology
The mathematics of halftoning — Adler 5

Robotics
Innovations in tape storage automation at IBM — Hellman 445

Semiconductor devices
A direct-conversion receiver integrated circuit for WCDMA mobile systems — Reynolds 337
Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies — Harame 139
Developing integrated antenna subsystems for laptop computers — Liu 355

Semiconductor technology
SiON high-refractive-index waveguide and planar lightwave circuits — Bona 239

Servers
On the performance and use of dense servers — Felter 671
Workload-based power management for parallel computer systems — Bradley 703

Signal processing
An innovative low-power high-performance programmable signal processor for digital communications — Moreno 299

Silicon–germanium
A direct-conversion receiver integrated circuit for WCDMA mobile systems — Reynolds 337
Design automation methodology and rf/analog modeling for rf CMOS and SiGe BiCMOS technologies — Harame 139
Foundation of rf CMOS and SiGe BiCMOS technologies — Dunn 101
SiGe BiCMOS integrated circuits for high-speed serial communication links — Friedman 259

Silicon-on-insulator (SOI)
Application of an SOI 0.12-μm CMOS technology to SoCs with low-power and high-frequency circuits — Plouchart 611

Simulation
Design and validation of a performance and power simulator for PowerPC systems — Shafi 641
Design of optical communications data links — Pepeljugoski 223
New methodology for early-stage, microarchitecture-level power–performance analysis of microprocessors — Brooks 653
On the performance and use of dense servers — Felter 671

Storage (computer) devices and systems
Fifty years of IBM innovation with information storage on magnetic tape — Bradshaw 373
Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471
Tape management in a storage networking environment — Deicke 453
The IBM Virtual Tape Server: Making tape controllers more autonomic — Kishi 459

Storage hierarchies
Comparison of analytic performance models using closed mean-value analysis versus open-queuing theory for estimating cycles per instruction of memory hierarchies — Matick 495
Fifty years of IBM innovation with information storage on magnetic tape — Bradshaw 373
Six orders of magnitude in linear tape technology: The one-terabyte project — Childers 471
Tape management in a storage networking environment — Deicke 453
The IBM Virtual Tape Server: Making tape controllers more autonomic — Kishi 459

Switches
Prizma switch technology — Engbersen 195

Switching circuits
Prizma switch technology — Engbersen — 195

System-on-a-chip (SoC)
The design and application of the PowerPC 405LP energy-efficient system-on-a-chip — Nowka — 631

Testing
Head reliability of AMR sensors based on thermal stress tests — Iben — 415

Topology
Ergodic theory of one-dimensional dynamics — Martens — 67
